

MEGALITE DRAG PERFORMANCE*

■ MAX DRAG

* ML2000, ML3000 and ML4000 use a cork drag; ML5000 features a strong carbon-fiber drag system.

ML2000

WEIGHT: 11.2 oz.
RETRIEVE RATE: 28.0 in.

ML3000

WEIGHT: 13.8 oz.
RETRIEVE RATE: 33.4 in.

ML4000

WEIGHT: 13.3 oz.
RETRIEVE RATE: 33.4 in.

ML5000

WEIGHT: 13.1 oz.
RETRIEVE RATE: 36.0 in.

MEGALITE LINE CAPACITY

MODEL	MONO CAPACITY	BRAID CAPACITY	GEAR RATIO
ML2000	140 yds. / 6 lb.	85 yds. / 30 lb.	5.2:1
ML3000	160 yds. / 8 lb.	145 yds. / 30 lb.	5.2:1
ML4000	230 yds. / 10 lb.	200 yds. / 30 lb.	5.2:1
ML5000	225 yds. / 12 lb.	275 yds. / 30 lb.	5.2:1

STACKED CARBON FIBER DRAG

For heavier lines and bigger fish, the ML5000 has a carbon fiber drag stack for smooth stopping power.

MEGALITE®

MEGA LITE[®]

by FIN-NOR[®]

Fin-Nor Durability For Inshore Action.

MegaLite is Fin-Nor's ultimate inshore flats or bay series. Engineered with the ruggedness of our big water reels, MegaLite is ideal when skinny water offers adventure and big fish opportunities.

Featuring super-smooth cork drags (ML2000, ML3000 and ML4000), or a strong carbon fiber drag (ML5000), these reels are perfect for redfish, snook, bonefish, permit, yellowtail, jacks and other flats or close-to-shore fish.

If saltwater inshore fishing is what you do, you need the quality and durability of Fin-Nor's MegaLite series in your boat.

Learn more at www.finnorfishing.com.

Strong Aluminum Body, Frame and Rotor

This design provides strength and prevents the reel from twisting under severe loads. Patented computer rotor design creates perfect balance. Graphite side plates make MegaLite light enough to fish all day.

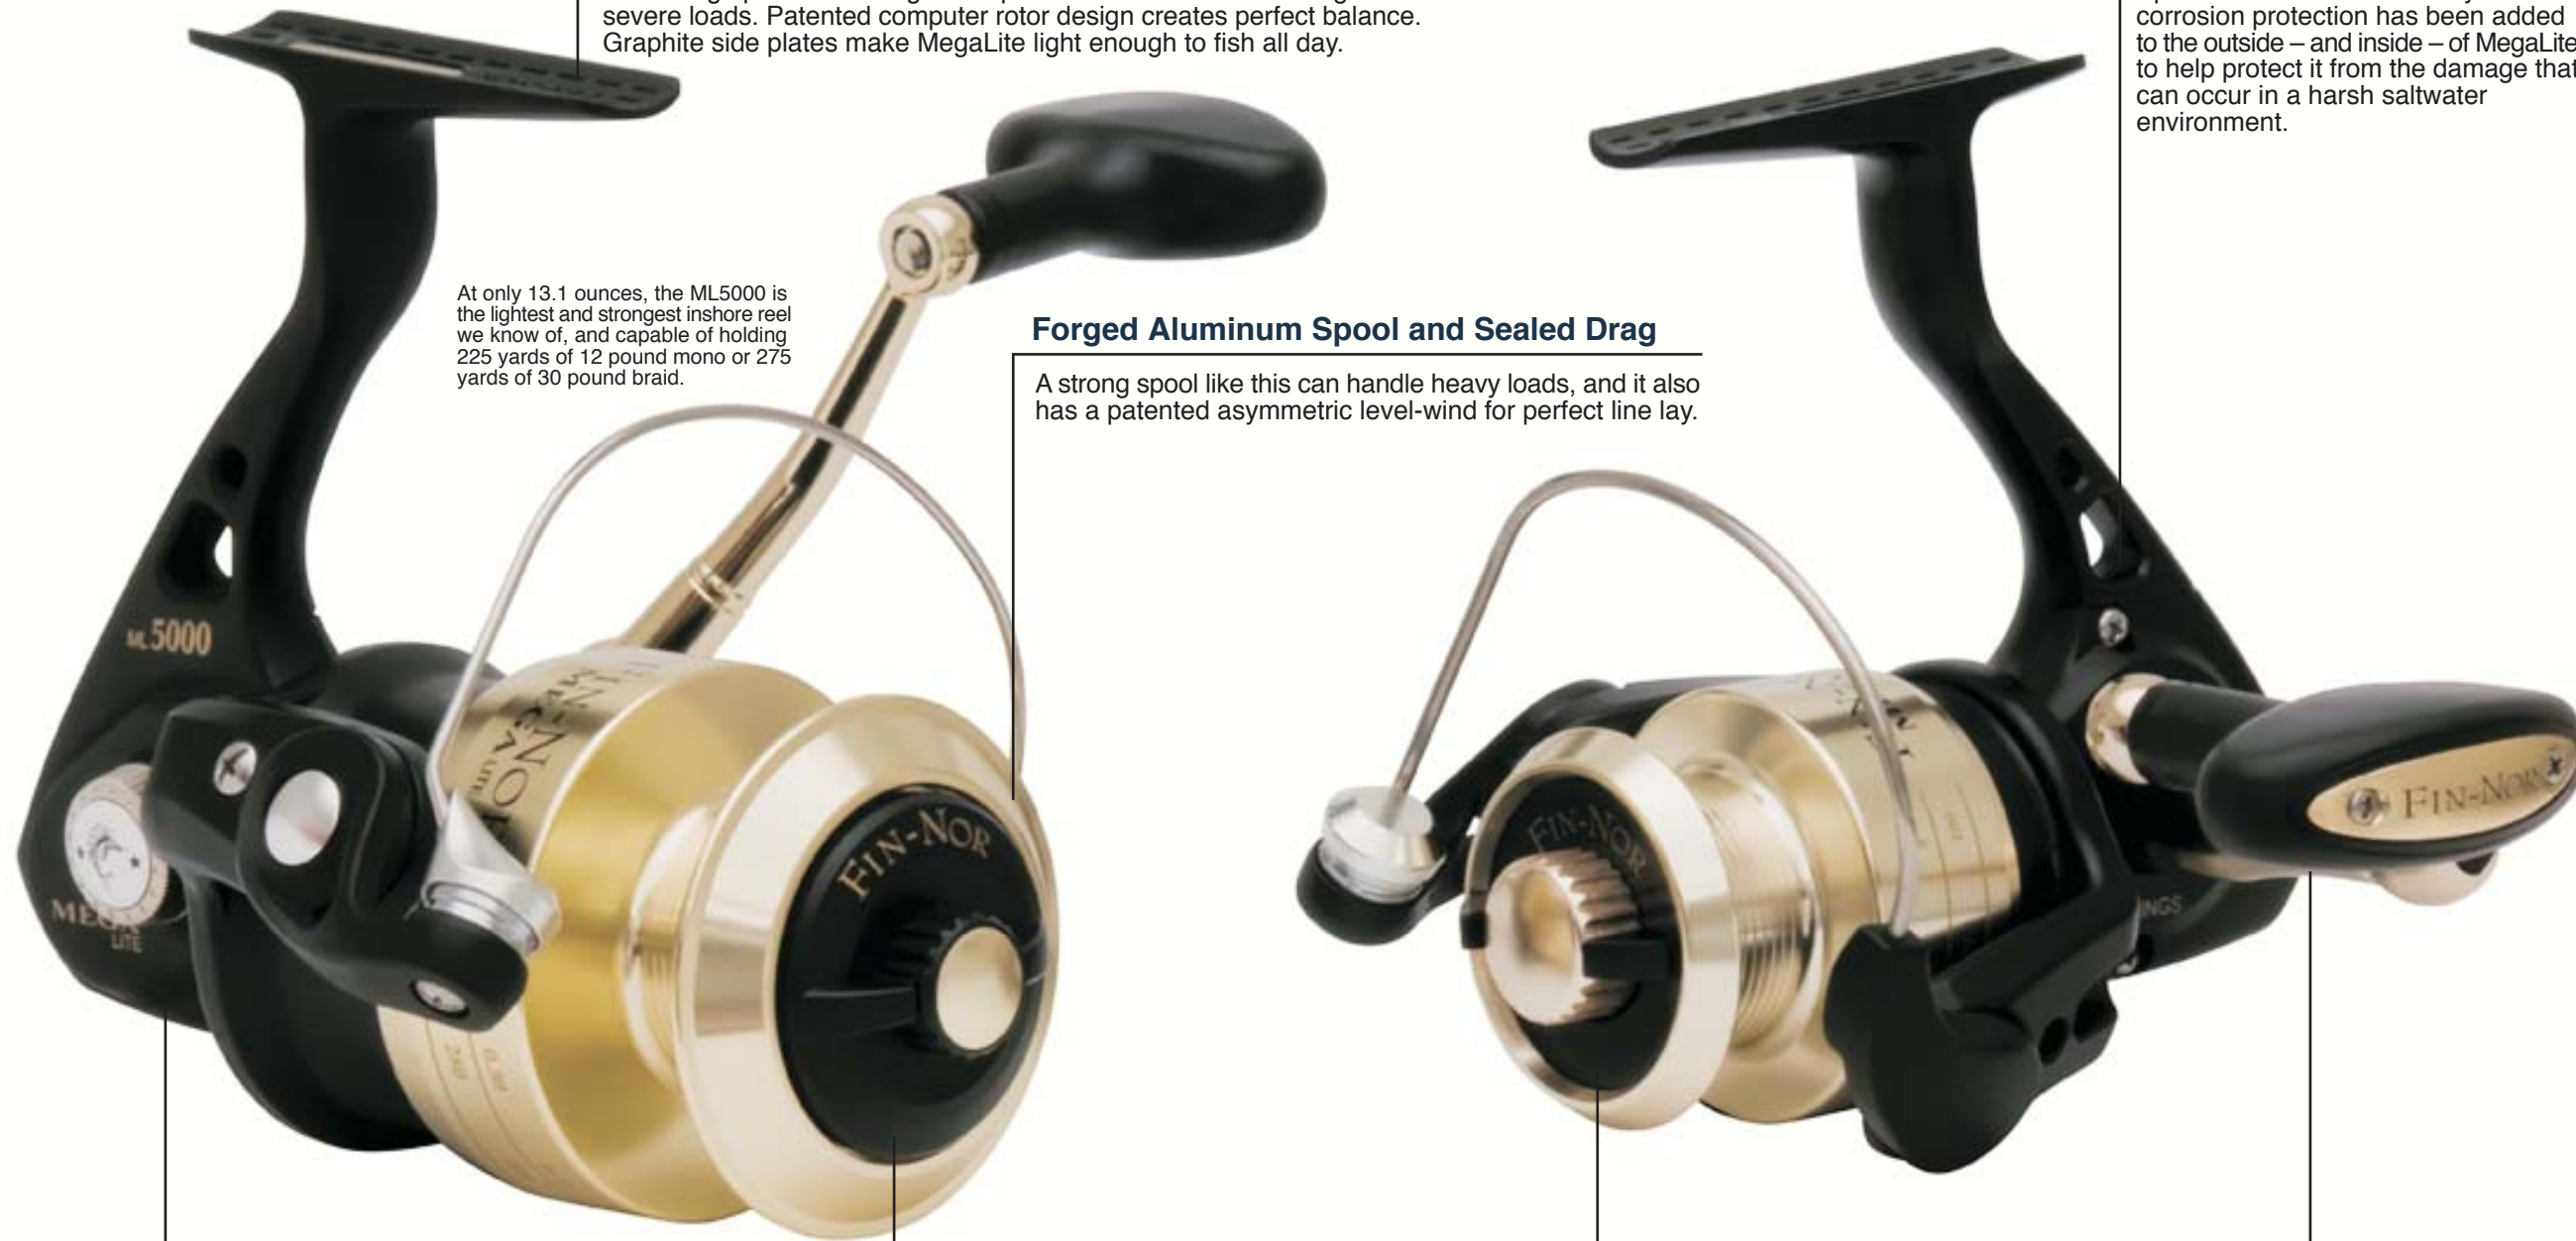

At only 13.1 ounces, the ML5000 is the lightest and strongest inshore reel we know of, and capable of holding 225 yards of 12 pound mono or 275 yards of 30 pound braid.

Forged Aluminum Spool and Sealed Drag

A strong spool like this can handle heavy loads, and it also has a patented asymmetric level-wind for perfect line lay.

Lightweight and Strong

Special electrostatic multi-layer corrosion protection has been added to the outside – and inside – of MegaLite to help protect it from the damage that can occur in a harsh saltwater environment.

Strong Brass Pinion Gear

Durable brass pinion gear is supported by an over-sized bearing to maintain perfect alignment – even under heavy fish loads. This means you can put tension on your drag and not worry about gear flex or slippage.

Smooth Powerful Drag

MegaLite 2000, 3000, and 4000 feature cork drags that have been proven smooth in saltwater – especially great for light-lining. The MegaLite 5000 has a carbon fiber drag that allows you to fish with mono or braided line with up to 18 pounds of lock-down drag. This versatility and strength make MegaLite the perfect inshore or flats fishing spin reels.

Anti-Reverse Clutch Support

Strong oversized MegaLock™ magnetic clutch offers you solid hook-sets and is supported with an equally strong aluminum clutch housing that makes this reel durable, long-lasting and able to handle braided or monofilament line – for fighting big fish.
