SPORTFISHER CONVENTIONAL LINE CAPACITIES

MODEL	GEAR RATIO	MONO CAPACITY	BRAID CAPACITY	IPT*
ST30	4.1:1	460 yds. / 30 lb.	575 yds. / 65	35.0
ST50	3.4:1	450 yds. / 50 lb.	975 yds. / 80 lb.	37.0

IPT = Inches Per Turn (retrieve rate)

TOTAL CONTROL Precision-engineering, high-grade materials and solid construction makes our Sportfisher trolling reels ideal for bluewater fishing.

NEW FOR 2010

Sportfisher™

by FIN-NOR

Sportfisher is ready whenever you are.

The Fin-Nor Sportfisher was created for anglers wanting a versatile, large-line-capacity, strong and durable reel. With a 30-size or a 50-size spool, these star-drag reels carry plenty of line and are strong enough to be used for any type of blue water fishing.

Built for value-minded anglers who still demand Fin-Nor's legendary quality, Sportfisher creates an opportunity for those who may have never previously fished with Fin-Nor. We used the latest materials and built in all of the features that today's anglers demand.

Sportfisher is the perfect reel for summer fishing, party boat fishing, or tournament fishing. Easy-to-use and durable, Sportfisher reels are sure to become mainstays on just about every type of fishing boat.

Solid 1-Piece Aluminum Frame

No multi-piece frame here – this is a solid 1-piece aluminum frame, just one of the keys to the strength and durability of Sportfisher reels.

Huge, Heavy-Duty Harness Lugs

Huge one-piece stainless steel harness rings are sandwiched on either side of the aluminum frame between the side plates. This patent-pending design adds strength and rigidity and allows you to harness in without worry when fighting a big, hard-running fish.

Ergonomic Handle and Stainless Steel Components

An ergonomic handle that is comfortable and easy to hold on to, and an all stainless steel crank arm and star drag control create a sturdy long-lasting connection.

Oversized Heavy-Duty Drag

Ten oversized drag washers and double heavy-duty Belleville washers allow Sportfisher tremendous drag range. Carbon fiber makes it smooth and offers 30+ pounds of drag load. This is a reel ready for big fish!

Huge Bronze and Stainless Gears

A huge bronze main gear that is ball-bearing supported and has oversized teeth, smoothly and firmly meshes with an even stronger stainless steel pinion gear. This is a gearing system that will last for years and hold up to hard-pulling grouper, sharks, and other blue water fish

Advanced Materials

Advanced side plate materials allow for precision alignment of internal components, as well as strength, durability and low water absorption. Sportfisher is not just built to look good – it's built to last.

Sportfisher Spinning Combos

Both Sportfisher trolling models are also available as a pre-mounted combo. Each is perfectly matched with a heavy-duty E-glass rod that features aluminum-oxide guides, comfortable EVA grips, and a rubber gimble for comfortable, all-day use.
